

Process Payments with QuickBooks®  
Using Your Transaction Express® Account

DPC helps you streamline your payment processing and accounting demands with Payment Terminal for QuickBooks. This add-on **seamlessly integrates** DPC's secure payment gateway, Transaction Express, with your QuickBooks accounting software to help you ease your back office burdens. This simple, yet robust solution is for all real-time payment transaction processing against: invoices, statement charges and sales receipts from QuickBooks, with a single login to one single point-of-entry.

### Benefits of Processing through Transaction Express with Payment Terminal for QuickBooks:

**Improve Efficiency** – No need for manual entry or exporting information from Transaction Express into QuickBooks

**Save Time and Money** – Complete automation eliminates manual entry which means fewer man-hours required for your accounting needs

**Improve Accuracy** – Reduce issues that can occur with manual entry as a result of human error

**Powerful and Secure** – Transaction Express integrated with the Payment Terminal provides a PCI-SSC and PCI-DSS compliant payment processing and accounting solution

### Highlights

- Process ACH transactions, credit cards, and signature debit card transactions in real time
- Process payments for invoices
- Automatically apply payments
- Multi-user and multi-account support
- Secure PCI credit card and ACH/EFT customer data vault
- Full tokenization security
- Store multiple payment methods per customer
- Multiple customer processing
- Pull and post data to and from QuickBooks – eliminates double entry
